ROBO CLUB

Hands-on Robotic
Education

About RoboClub

TX Roboclub offers an engaging platform for students within your institution by stimulating learning and giving them an International platform to exhibit their skills, talents and innovation.

Be the part of the community of like-minded robotics enthusiasts who are curious, innovative, creative and wish to come together to learn and share. Building a robot is about more than just putting pieces together! Explore and analyze the world around you as you understand the science behind creating and programming a robot.

Cost Structure

Virtual Learning Model

N12,000 per term

Students are part of live online interactive classes with experienced tutors exploring various tech concepts, providing quality and in-depth answers to students' questions.

Hybrid Learning Model

N15,000 per term

This model has the added benefit of having a tutor visit the school once a week to train on site.

Minimum of 10 students per school

Minimum of ten members per RoboClub. Schools can have multiple RoboClubs

Benefits of RoboClub

- Registration of Club name at TX domain
- Networking with international robotics club members. Opportunity to benchmark knowledge and technologies.

Benefits of RoboClub

- Attend FREE Online Live Sessions to make various types of bots throughout the year
- Participate in State/ National/ International Championships and get awards
- Attend FREE Tech Seminars
- Highlight your innovations on TX app and FT News
- International Ranking of your Club. Top rankers may get sponsorships for making bots.
